# Enfys

Enfys is a multifaceted business house focused on Solar Power, UPS, Security, Health & Hygiene products and solutions, based at KERALA ("Gods Own Country") located at the Southern Tip of Indian Sub-Continent.

Enfys is providing Best Quality Products and Market Leading Technology and Related Services to our customers throughout the country.

In 2015 Enfys started as a small distribution company of solar products lead by a team of enthusiastic personals from different fields. Team Enfys is grown from 3 to 15 in the short span of time by adding professionals in administration, marketing and technical fields.

*We are very thankful for our customers, supporters and most of all to the omnipotent and omniscient originator and ruler of the universe.*

Thank You  
**Team Enfys**

# Add value to you and your bussiness

## The Mission

Provide quality products and services to help enhance our customer's business

Providing excellent service and support.

Providing timely and efficient deliveries.

Providing a trained and knowledgeable sales representative to service all our customers.

Offering full-service new store setup for newcomers utilizing our product knowledge and experience.

We  
Build  
Relationships  
By Marketing  
Quality not Price

## Why Choose Us?

Quality Products with International Standards

Exclusive industry knowledge with over 5 years of experience

Custom-made system design for any kind of needs

Quick response customer service

Expertise of experienced technicians

Committed work force

Excellent value for your money

After sale service

# CSR

Corporate  
Social  
Responsibility

The nature doesn't need us, we need the nature to live. Preserve the nature for our coming generations, so that they can also live.

In no matter which direction we focus our energies, it has but one purpose: to help build a better quality of life for people and to give back to society what we have taken from it. We help the planet by helping businesses sell renewable energy products.

At Enfys, we're passionate about the Earth and its ecology. We don't simply talk, we also walk by leading an eco friendly lifestyle.

An Initiative to Protect  
Our Nature, by ENFYS.

## Our Pledge

To Mother  
**EARTH**  
& To The  
**SOCIETY**

## Planet & Society PLEDGE

We contribute to the NGOs and other agencies. Every time we sell our products, one percent of the revenue goes for this. In purchasing ENFYS TRADE LINKS's products or services, the people are not only helping their family or their customers go green, they are helping ENFYS TRADE LINKS's own pledge of at least one percent of annual revenue toward a healthier Society.

# SOLAR Energy Systems

## EPC Company

(Engineering, Procurement & Construction)

Energy is essential for the modern lifestyle and demand for energy is expected to remain vigorous worldwide. Enfys Power Solutions, a division of Enfys Trade Links, is contributing to the implementation of infrastructure that enriches quality lifestyle for people. In order to diminish your electricity cost and ensure a stable supply of electricity, we offer solar power generation facilities in the renewable space.

Enfys Power Solutions provides EPC solar energy solutions from concept to commissioning for solar PV plants and also operation and maintenance services throughout the lifetime of the project. We use market-leading top quality technology and products to design, install and commission our solar projects.

## EV CHARGING Stations

### INVEST IN THE FUTURE (Engineering, Procurement & Construction)

IEV charging station in India has an enormous scope. Due to lack of charging stations in the country, the market is still empty, and you can create a great monopoly over owning EV charging stations. Due to subsidies on the building of charging stations along with slashed rates of electricity provided these charging stations. The vast scope anyone can utilize.

If someone own a business like Hotel, Resort, Shopping complex, Supermarkets, Hospitals, IT companies etc.. or the space with 2 car parking, they can install an individual station in their premises. Also for Flats common charging facility (AC Charging) will be an advantage.

# POWER BACKUP

Products & Solutions

## UPS, Inverter & Battery

In today's world of critical applications where continuous power is essential to daily operations, we provides comprehensive AC & DC power solutions for residential, corporate & industrial environments.

One window complete solution backed by the highest level of service and support by a team of highly skilled individuals makes us the number one choice for your power solutions.

We provide state of the art, top quality products meeting International standards.

### SERVICES

- ◆ UPS
  - Designing
  - Product Procurement
  - Installation
- ◆ Annual Maintenance Contract (AMC)

### PRODUCTS

- ◆ Inverter
- ◆ On-Line UPS
- ◆ Off-Line UPS
- ◆ High Capacity UPS
- ◆ Medical UPS
- ◆ Industrial UPS

# ENERGY & SAFETY Audit

## ENERGY AUDIT

Energy audit is an official scientific study of energy consumption of an organisation / process / plant / equipment aimed at reduction of energy consumption and energy costs without affecting productivity and comforts and suggesting the methods for energy saving and reduction in energy cost. Energy audit is carried out in planned, official manner by every energy intensive organisation/plant management.

### Benefits of doing an energy audit?

- Helps to reduce energy costs in your facility.
- Increase the life span of the equipment in your facility.
- Discovers any unaccounted consumption that may exist at the facility.
- Increase the security of your energy supply.
- Helps reduce environmental damage and pollution.

## SAFETY AUDIT

A safety audit is a structured assessment and evaluation of how workplace activities can affect health and safety. It helps organizations to evaluate and optimize their health and safety programs and improve safety management.

### Reasons for doing a safety audit?

- To determine your Safety & Health programs and procedures are working.
- To Check the safety of your workplace.
- To discover and identify potential hazards.
- To verify compliance with applicable rules.
- To evaluate the effectiveness of existing management controls.
- To check the safety of your equipment.
- To evaluate the adequacy of your employees' safety training and performance.
- To verify that your processes are in compliance with company policies and regulations.

# HYGIENE
